DEPARTMENT MEMORANDUM
No. 160, 8 1976

LOCAL BAKING OF NUTRIBUNS FOR
EMERGENCY DISASTER FEEDING

To: Regional Directors and
Schools Superintendents

To ensure the local baking of nutribuns for emergency disaster feeding and to implement the agreement of the members of the National Disaster Control Commission without waiting for instructions from the Department of Education and Culture and CARE/OPS, the following instructions are being issued to all school officials:

1. Regional Directors and schools superintendents should initiate steps for emergency nutribun feeding if, for some reason, no solution is given by relief agencies during a disaster. However, coordination with these agencies should be sought on any action taken by DCC officials.
2. Regional Directors are to submit to the DCC and CARE/OPS a list of nutribun bakeries which can bake nutribuns during a state of calamity.

The details of such bakeries should include emergency baking, price of baking and other details needed to supply nutribuns to people in calamity areas.

3. A written report on the amount of flour and other commodities used, places assisted and number of people served, number of nutribuns baked and cost of baking with supporting papers should be furnished CARE/OPS.

The format of the report and a copy of the understandings reached on July 15, 1975 by the members of the

National Disaster Control Commission
are hereby attached.

4. Regional directors and schools superintendents are requested to give this Department Memorandum prior attention.

(SGD.) JUAN L. MANUEL
Secretary of Education and Culture

July 23, 1975

Mr. Robert Lindor
Director
CARE/Philippines
1010 A. Mabini Street
Ermita, Manila

Dear Bob:

This letter is to confirm to you and the other participants in the understandings reached in our July 15, 1975 conference on the local baking of nutrients for emergency disaster feeding.

After long and thorough discussion, the conference concluded that the best way to insure that local initiatives will be taken for baking nutrients in the local facilities of the DEC School Nutrition Program, or commercial bakeries when disaster strikes, will be as follows:

Understandings Reached in the July 15, 1975
Conference on Local Baking of Nutrients for Emer-
gency Disaster Feeding.

1. Local officials of the LGU, PNEC, Office of Civil Defense, Provincial and Municipal Disaster Relief Committee, DEC, etc., will now be advised by their central offices of the local nutrient production capabilities of the Philippine School Nutrition Program.

2. The Provincial and Municipal Disaster Relief Committees (as represented by the local LGU and/or PNEC members) can request the local DEC personnel, including individual school principals, to produce nutrients to meet local disaster needs; especially those needs arising in the first 72 hours of the disaster when packaged food such as the nutrients are most useful.

3. Local schools participating in the Philippine School Nutrition Program will respond to these local requests by utilizing flour stocks they may have on hand and their regular baking facilities. If they have no flour stocks locally under school control, these may be borrowed from local commercial sources to initiate baking for the disaster.

4. Cost for this local baking will, at least initially, be borne by the concerned Provincial Relief Committee usually drawing on DSW and/or PRRS local funds. Cost will be the regular price charged for the 500-calorie nutrition baked in the Philippine School Nutrition Program. 500-calorie buns should be produced for disaster feeding rather than the 300-calorie bun now being introduced under the Philippine School Nutrition Program.

5. Any disaster relief baking initiated locally under this plan, will be reported to the Office of Civil Defense/ National Disaster Coordinating Center, Camp Aguinaldo, Quezon City, through the COM radio network within 24 hours after it starts so as to coordinate with any central nutrition baking for the disaster that may be planned or required from Manila or elsewhere.

6. Within the first 72 hours of the disaster, CARE and other concerned agencies in Manila, will dispatch personnel to the disaster area to help coordinate local nutrition baking activities.

7. CARE, CRS, etc., in Manila, will attempt to replace to the Philippine School Nutrition Program and local commercial sources, any flour diverted from that program by local schools for disaster baking as soon as possible so as to prevent disruption of the normal Philippine School Nutrition Program.

8. CARE, and other concerned agencies, will work out reporting systems for this local initiative, disaster relief nutrition activity.

9. CARE will be the U.S. Voluntary Agency in Manila managing baking nutrition for disaster feeding at provincial levels.

This letter is being copied to the concerned agencies for their review and action in immediately coordinating with their field offices throughout the Philippines so that this disaster activity will be implemented automatically if and when disaster strikes again.

Sincerely yours,

(SGD.) ~~WALTER~~ HARRISCH
