RE : UNESCO-Israel Co-Sponsored Fellowship for Post Doctoral Studies
in Science and Technology

Dear Honorable Secretary Roco,

UNESCO's Co-Sponsored Fellowship Scheme in collaboration with the Government of Israel, have decided to offer 14 fellowships for post doctoral research training in Israel for eligible candidates from various countries. The training will take place in one of the universities in Israel.

The government of Israel is seeking for candidates from the Philippines. The deadline for submitting the application forms is 30 November 2001. The application forms should be sent by the applicant directly to the universities. A list of the contact persons at the universities is enclosed herewith.

I would appreciate it if you could inform the competent authorities in the Philippines about the scholarship program, and I do hope that, though time is quite short, that a suitable candidate from the Philippines will be located.

With warm regards,

Sincerely Yours,

IRIT BEN-ABBA
Ambassador

**Subject: UNESCO/ISRAEL Co-Sponsored Fellowships
for Post Doctoral Studies in Science and Technology
2001-2002**

Madam/Sir,

On behalf of the Director-General and the Government of Israel, I have pleasure in informing you that, within the framework of UNESCO's Co-Sponsored Fellowships Scheme, Israel has generously offered 14 fellowships for post-doctoral research training in Israel for eligible candidates from developing countries. It is hoped that in this manner impetus can be given to research in science and technology and to promoting the active involvement of deserving young scientists in research that can contribute to the solution of the problems of contemporary society.

Aware of your Government's interest in the strengthening and the enhancement of the role of the scientific community, made up of both young men and women, we are confident that it will attach great importance to these fellowships and will be in a position to disseminate this offer widely. It would be appreciated if you could transmit this offer to interested governmental and non-governmental bodies. In particular, scientific research institutes and institutes of higher education should be encouraged to nominate meritorious candidates through your National Commission.

The target group, eligibility criteria, conditions for application, application procedures and terms of the fellowships are detailed in Annex I to this letter. Interested candidates are encouraged to contact directly the Universities/Institutes in Israel that are listed in Annex II (relevant internet address and the fax numbers have been provided with a view to facilitating contact with the relevant university/institute).

**To : National Commissions for UNESCO (list of countries in Annex IV)
Permanent Delegations (list of countries in Annex IV)**

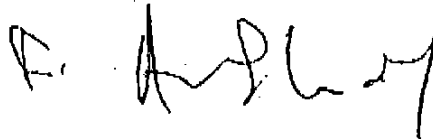

Adresses postales : 7, place de Fontenoy, 75352 07 SP / 1, rue Miollis, 75732 Paris Cedex 15
Télex : 204461 Paris:: 270602 Paris - Téléphone central : +(33.1) 45.68.10.00 - direct 45.68.15.07
Téléfax central : +(33.1) 45.67.16.90 - Direct 45.68.55.03 - E-Mail : f.abou-shady@unesco.org

This programme is offered in open competition. Owing to the fact that the number of fellowships put at the disposal of UNESCO under this programme is limited, only candidates with the necessary qualifications and who have obtained the requisite agreement of the host university/institute in Israel will have a chance to be selected. The research fellowships are intended for persons who demonstrate outstanding intellectual promise, imagination and personal commitment, and who may be expected to make significant contribution to their country on return. Special attention will be paid to applications on behalf of young women scientists and to candidatures from the least developed countries.

Owing to the fact that English will be the medium of communication in the university/institute in Israel, this letter is available in English ONLY. Kindly note that the deadline for submission of candidacies to the Israeli host university is 30 November 2001.

I am confident that this joint UNESCO/Israel venture will serve to strengthen UNESCO's efforts to encourage the participation of young scientists in global development issues.

Please accept, Madam/Sir, the assurances of my highest consideration.

Farida Abou-Shady
Chief,
Fellowships Section

UNESCO/ISRAEL Co-Sponsored Fellowships
for Post-Doctoral Studies in Science and Technology
2001 - 2002

A. INTRODUCTION

Within the framework of UNESCO's Co-Sponsored Fellowships Scheme, a joint programme is being launched with Israel's Planning and Budgeting Committee of the Council for Higher Education, and the Israel National Commission for UNESCO, with a view to promoting post-doctoral study and research in science and technology. Fourteen (14) fellowships will be awarded to post-doctoral candidates from developing countries interested in undertaking research in state-of-the-art universities/institutions in Israel. Candidates should be young scientists originating from UNESCO's developing Member States who, through their enthusiasm and innovative research are making valuable contributions to further the development of science and technology.

The UNESCO/Israel Co-Sponsored Fellowship scheme focuses on UNESCO's premise that people are the world's greatest resource and that innovation and excellence, especially in the young, deserve to be encouraged through the concerted efforts of the international community. The award of the fellowships constitutes a key strategy through which impetus is being given to the enhancement of the role of young women and men scientists, in devising scientific solutions to problems confronting humankind today and tomorrow.

B. TARGET GROUP

The programme is designed to identify and reward 14 deserving, committed and talented young women and men scientists, from the developing world, active in research in science and technology. With a view to ensuring a balanced distribution among the participating universities/institutes in Israel, each of the seven host institutions will receive 2 fellowships for deserving candidates selected by them.

Candidates must be engaged in pursuing research at the post-doctoral level in one or allied fields of science and technology.

Special attention will be given to candidatures on behalf of women and from the Least Developed Countries (LDCs).

C. ELIGIBILITY

Applicants must meet the following general criteria:

1. Be from a developing country listed in Annex IV.
2. Candidates must have received - within two years of the beginning of the research period (i.e. not earlier than February 2000) a Ph.D degree in the science or technology fields.
3. Only candidates with the necessary qualifications, who demonstrate outstanding intellectual promise and personal qualities, shall be considered under this programme.
4. Candidates must be able to integrate an on-going research programme being conducted at one of the universities/institutes listed (Annex II).
5. Candidates must be able to communicate in English.
6. Applicants must be in good health, both physically and mentally.

D. CONDITIONS FOR APPLICATION:

1. Domains of study: Science and Technology
2. Duration of proposed study/research: 1 Academic year
(where warranted the fellowship may be extended for up to an additional year)
3. Closing date for receipt of applications: 30 November 2001
4. Date of commencing research: Anytime between 1 February 2002 & 30 September 2002
5. Place of study: Israel
(In one of the universities/institutes listed in Annex II)

Additional Information: Additional information and assistance can be obtained by contacting **directly** either the university/institute in Israel where placement is desired, or, the Embassy (or the representatives) of Israel in the candidate's country. Only the listed universities/institutes in Israel can provide ample information on study/research being currently conducted by them. The name of the Vice President for Research in the participating universities/institutes is included with a view to facilitating communication between interested candidates and the host institute.

UNESCO and Israel attach the greatest importance to originality and quality. Consideration will be given only to well-planned projects where the necessary contacts with the host university/institute in Israel have been made and that demonstrate innovation, imagination and relevance, and, which promise to contribute to knowledge in science and technology.

Files which are incomplete or which are received after the deadline for application, as well as candidatures that do not fulfil the requirements mentioned above, will not be taken into consideration.

E. FACILITIES OFFERED BY ISRAEL

The fellowship, generously financed by the Planning and Budgeting Committee of the Council for Higher Education of Israel and the Israel National Commission for UNESCO, shall consist of the following:

An all inclusive lump-sum contribution of **US\$15,000** per year for each selected beneficiary to support her/him during study/research in Israel. The amount offered should cover the international travel costs for the approved itinerary, accommodation, meals, books, local transportation, telephone expenses, medical insurance, and, incidentals, etc.

Note: No provision to finance or lodge family members is made. Facilities will not be available to provide appropriate living conditions, and, the amount of the fellowship is adequate only for the living expenses of the fellow himself/herself.

F. SELECTION OF BENEFICIARIES

Each of the seven participating universities/institutes in Israel will make their final selection of the most deserving candidates.

The Israeli university/institute will inform unsuccessful candidates by 31 January 2002. Candidates not informed of their selection by that date should consider that their application has not been accepted.

Only selected candidates will receive a letter of award from UNESCO
