DECS ORDER  
No. 86, s. 1998

CABINET DESIGN FOR DECS-NSTIC-DEVELOPED  
SCIENCE EQUIPMENT

To: Regional Directors  
Bureau/Center/Service Directors  
Schools Superintendents

1. The National Science Teaching Instrumentation Center (NSTIC), in accordance with its mandate as stipulated in Executive Order No. 112, "to prototype science equipment for the country's secondary schools," to date has produced prototypes of basic science equipment (Batch "A") as well as of equipment for Physics Mechanics (Batch "B"). Of these equipment, 1,651 sets have been mass-produced and distributed to selected recipient schools in the regions.

2. Feedback, however, have indicated that the aforementioned science equipment sets have not been properly stored for lack of cabinets in the schools. The sets of equipment are being returned to their boxes after use by the students and placed in inappropriate places.

3. In order to address this problem, the design of a cabinet (see attachments) is enclosed for the NSTIC equipment Batch "A" and other batches of equipment that may follow or of other science equipment from other sources.

4. With the end in view of providing proper and safe storage for the sets of science equipment to lengthen their serviceable life and to prevent damages, recipient schools are therefore requested to source funds for the construction of this cabinet either from donations of the PTA and other organizations or from the division offices and school boards.

5. Immediate and wide dissemination of this Order is directed.

*Andrew Gonzalez*  
ANDREW GONZALEZ, Jr.  
Secretary

Incls.: As stated

STANDARD STORAGE TRAY  
Quantity: 2000 Required

1. Body angle minimums and finish of both ends  
 2. Provide burrs to break away from  
 3. Provide chamfered corners and edges

4. Same as per spec  
 5. Green dye inspection  
 6. Nonporous finish

7. All roughness are to conform  
 8. except otherwise specified  
 9. Smoothness of sharp edges

SCIENCE EQUIPMENT STORAGE RAY  
 MULTITIER MP STORAGE RAY

SECTIONING:  
 1. Apply symbols indicating room finish on both face.  
 2. Provide finish (F) hinges in every case.  
 Use the conventional floor finish symbols.

DOOR 2

• Dimensions in 1/4" increments unless otherwise specified.  
 • Dimension all straight edges.
